Subject: [External] Dominion Energy net metering tariff

It has come to my attention that Dominion energy is proposing a basic service charge to solar costumers and subscription fee for annual cost of around \$750 for customers with solar. Also they are looking to reduce the dollar for dollar rate reimbursement to 3 cents per kilowatt hr. I installed solar around 4 years ago and this decision was based on the dollar for dollar rate. If these change are made anyone who made the decision to go with roof top solar would never get there investment back, and it would not make financial sense to go with roof top solar in the future. I hope this is not the direction Dominion Energy is allowed to go in.

Thanks

Dean Pirtle
